

MONGKHON HATIT

AI Engineer | Full Stack Developer

Bangkok, Thailand | mongkhon.hatit@gmail.com

[GitHub](#) | [LinkedIn](#)

PROFESSIONAL SUMMARY

AI Engineer and Full Stack Developer building production-ready systems across deep learning, computer vision, LLM applications, RAG pipelines, and n8n automation. Experienced in turning research prototypes into dependable products.

PROFESSIONAL EXPERIENCE

AI Engineer & Full Stack Developer | Landyhome 2024 - Present
Bangkok, Thailand

- Architected AI integrations across customer-facing products.
- Built a production RAG assistant with hybrid search and evaluation pipelines.
- Designed n8n workflows connecting LLM agents, CRM events, and approvals.
- Delivered React dashboards and Python APIs with observability and guardrails.

AI Research Engineer | NECTEC 2022 - 2024
Pathum Thani, Thailand

- Developed computer vision models for real-time edge inference.
- Built reproducible training and data pipelines for ML experimentation.
- Improved performance through error analysis and transfer learning.

TECHNICAL SKILLS

AI & ML: Python, PyTorch, TensorFlow, LangChain, LlamaIndex, OpenAI
Development: React, TypeScript, Next.js, FastAPI, Node.js, PostgreSQL
Cloud & DevOps: AWS, Docker, GitHub Actions, n8n, Linux, Vector DB
Creative: Figma, Blender, Photoshop, Premiere Pro

SELECTED PROJECTS

Nexus RAG Engine | Python, LangChain, Qdrant, FastAPI
Hybrid retrieval platform with grounded answers and evaluation dashboards.

Vision Safety | YOLO, PyTorch, OpenCV, Docker
Real-time PPE and restricted-zone monitoring for industrial environments.

Cyber RPG | React, LLM Agents, Node.js, PostgreSQL
Generative role-playing experience with adaptive narrative agents.

CERTIFICATIONS & ACHIEVEMENTS

- Gemini Certified Educator - Google for Education, 2025
- Deep Learning Specialization - DeepLearning.AI, 2024
- 3rd Place - National AI Innovation Challenge
- Top 5 - Thailand Smart City Hackathon
