SUMMARY

AI Engineer with 2+ years of experience building and deploying production-ready AI solutions across LLMs, RAG/MCP agents, computer vision, and optimization systems. Experienced in end-to-end AI pipelines, enterprise integrations, and scalable automation with measurable business impact. Strong background in Python, PyTorch, FastAPI, React, and modern AI ecosystems, with a focus on performance, reliability, and practical deployment.

EXPERIENCE

LANDY HOME (THAILAND) CO., LTD

AI Full-Stack Engineer

Bangkok, Thailand

Aug 2025 - Present

- Designed and implemented an n8n-based workflow automation for Oil Engineering customer service operations, integrating Google Workspace and scheduled email notifications to streamline weekly and monthly engineer inspection tracking, reducing manual processing time from 87 to 26 hours per cycle — a ~70% improvement in operational efficiency.
- Designed and deployed an enterprise AI chatbot powered by RAG and MCP, integrating ChatGPT, Gemini, and Claude to enable secure, context-aware access to internal knowledge and business tools, reducing annual operating costs by approximately 420,000 THB per year.
- Developed and deployed a scalable Synology NAS-based File & Folder Management System, centralizing 92% of departmental file storage with database-backed metadata, streamlined upload/download and directory operations, and role-based access control (RBAC) by department and permission tier, improving file management efficiency by ~67% while supporting scalable server-side storage operations.
- Developed an end-to-end document review pipeline that automatically ingests, validates, and routes corporate files—handling multi-round feedback loops, auto-generating standardized PDF reports, and reducing manual processing time by 73%.

NSTDA (NECTEC) — AINRG Department

AI Researcher

Bangkok, Thailand

Aug 2024 - May 2025

- Designed and executed an end-to-end drone-based aerial data pipeline, including large-scale point cloud collection, preprocessing, visualization, and time-series analysis across multiple test scenarios and environments.
- Developed, tested, and validated algorithms for volume-change detection and classification through iterative experiments and performance benchmarking, achieving 95.4% accuracy and demonstrating reliability for real-world deployment.

Somporn Mould & Parts Ltd. — HCU Applied AI Industry Project

AI Engineer

Bangkok, Thailand

Jan 2023 - Mar 2023

- Developed AI-driven predictive maintenance and optimization solutions at Somporn Mould & Parts Ltd. Learning Camp, leveraging machine learning to predict machine conditions, optimize operational parameters, and estimate maintenance timing, helping reduce unplanned downtime and improve overall machine efficiency.

PERSONAL PROJECTS

- Built SmartLoad 3D, a React-based truck cargo optimization platform using 3D bin-packing, weight balancing, collision detection, and loading constraints, achieving 93% average space utilization, optimizing up to 200 cargo items per load, and generating optimized loading plans in approximately 2.5 seconds.
- Built SmartWarehouse 3D, an AI-powered warehouse optimization platform integrating demand forecasting, intelligent SKU slotting, route optimization, and interactive 3D visualization, reducing simulated picking distance by 40% across 500 SKUs while improving storage space utilization by approximately 35%.

AWARDS & RECOGNITION

- Finalist – AI Thailand Hackathon 2024 (AI COOKING):** Competed across 4 AI challenge domains — OCR, optimization, NLP, and AI model training—to develop solutions for real-world problem statements, advancing to the Top 5 in the competition.
- Silver Medal – National Software Contest (NSC) Thailand 2021 :** Developed a face-recognition school check-in system with COVID-19 temperature screening using CorgiDude, earning the Silver Medal at NSC Thailand 2021.

EDUCATION

Huachiew Chalermprakiet University

Jan 2021 - May 2025

Bachelor of Artificial Intelligence | GPA: 3.69

Relevant Coursework : NLP, LLM, Computer Vision, Deep Learning, Machine Learning, AI Ecosystem, Optimization Techniques

SKILLS & QUALIFICATIONS

Programming : Python, JavaScript, Dart, C, SQL, Rust

ML & Computer Vision : Pandas, NumPy, PyTorch, OpenCV, SAM3, YOLO, LangChain

LLM & Agent Tools : LLM API Integration (ChatGPT, Claude, Gemini), RAG, MCP, n8n AI Automation

Web Development : Flask, FastAPI, Tailwind CSS, Next.js, React.js, Node.js

Cloud & DevOps : AWS, Azure, Kubernetes, Docker, Git, GitLab, GitHub, Linux

Databases : PostgreSQL, MySQL, MongoDB, SQLite, Pinecone

Certificates : AI for All From Basics to GenAI Practice (NVIDIA, Dec 2025) , AI Fluency: Framework & Foundations (Claude, 2026)
